

SS&S Chapter 1 Instructor Guide

About Sailboats

This is an outline to offer instructors guidance in formulating some of the details in their presentation material. Many instructors incorporate some of these comments along with their own into the PPT slides.

Chapter 1

This Chapter explains many sailing terms which will certainly overwhelm the students if the instructor explains all or most of the terms in one class. It is suggested that the students be briefed on the structure and content of the chapter in order to use it as their reference while studying the course. Explain perhaps only about 25 of the most common terms. A suggestion is to advise student to place bookmarks on the pages with pictures/definitions of terms so that they can be readily consulted while reading the textbook.

Some of the figures in the slides contain written text that is too small to read on a PPT projector. The instructors must use their own ingenuity to convey this information. Suggest not using the PPT at all for this chapter, and have the students look at their textbooks while it is being discussed.

There are no comments offered on the PPT slides in this chapter.
